

Machine Learning Engineer - Vision & NLP Team
TechNova Solutions | Lahore, Pakistan | Full-time

About the role

We are looking for a Machine Learning Engineer to build and ship computer vision and NLP models into production for our retail analytics platform.

Required qualifications

- Bachelor's degree in Computer Science or a related field
- 3+ years of professional machine learning experience
- Strong Python programming skills
- TensorFlow or PyTorch for deep learning
- Computer vision experience (CNNs, object detection)
- SQL and data pipeline experience
- Git and collaborative software development

Preferred qualifications

- Natural Language Processing (NLP) and chatbot development
- Docker and containerised deployment
- Cloud platforms (AWS or Azure)
- MLOps practices and model monitoring
- Experience mentoring junior engineers

Responsibilities

- Train, evaluate and deploy vision and NLP models to production
- Own the feature engineering pipeline end to end
- Partner with product and backend teams on model integration
- Monitor deployed models and drive accuracy improvements
