PROFESSIONAL SUMMARY

Machine Learning Engineer with 3 years of experience building and deploying NLP and computer vision models for production use. Strong Python developer comfortable across the full pipeline from data cleaning to model serving. Looking for an ML Engineer role where I can grow into MLOps and cloud deployment.

EDUCATION

BS in Computer Science

Institute of Technology — Graduated 2021

SKILLS

Languages & Tools: Python, SQL, Power BI, Git

ML/AI: TensorFlow, scikit-learn, NLP (spaCy, Hugging Face Transformers), Computer Vision (OpenCV)

Other: REST APIs, basic Linux administration

WORK EXPERIENCE

Machine Learning Engineer — DataSphere Solutions

Jan 2022 – Present | Karachi, Pakistan (Remote)

- Built and shipped an AI-powered customer support chatbot using TensorFlow and Hugging Face Transformers, reducing average first-response time by 40%.
- Developed a computer vision defect-detection system for a manufacturing client using OpenCV and a custom CNN, cutting manual inspection time significantly.
- Wrote SQL queries and Python ETL scripts to prepare training data from multiple internal databases.
- Built internal Power BI dashboards so non-technical stakeholders could track model performance over time.

Junior Data Analyst — BrightPath Retail

Jun 2020 – Dec 2021 | Karachi, Pakistan

- Automated weekly sales reporting using Python and SQL, saving several hours of manual work per week.
- Assisted the data science team with cleaning and labeling datasets used for early NLP experiments.

PROJECTS

- AI Chatbot for E-commerce** — End-to-end chatbot (intent classification + retrieval-based responses) built with TensorFlow and deployed via a simple Flask API.
- Product Defect Detector** — CNN-based image classifier (OpenCV + TensorFlow) to flag defective items on a production line from camera images.
